CUT POOL OPERATING COST 70%

ELIMINATE EYEBURN

STRANTROL keeps water in precise chemical balance around the clock, thus eliminating problems such as eyeburn, inadequate disinfection, scale and corrosion.

The new STRANTROL Model #312 – designed with the budget in mind–reduces pool maintenance to occasional filter backwashing and a weekly pH test. Save enough in one year to pay for the entire installed cost of automation. Others have.

STRANTROL provides around-the-clock control without operator assistance or supervision, maintains pH and chlorine values with pinpoint accuracy. Routine maintenance is a fifteen minute job once a year. Hundreds of STRANTROL owners have solved water problems and reduced operating costs $5000 to $7000 per year.

STRANTROL is sold with a one year unconditional guarantee with right to return for rebate of full purchase price if dissatisfied for any reason.

☐ Send additional information and the location of STRANTROL controlled pools near me.

☐ Call me to arrange a STRANTROL demonstration at my pool.
